About the Department Library

Department library is a valuable resource for students, faculty, and researchers in the field, supporting their educational and research needs and helping them stay current with the rapidly evolving technology landscape. Moreover, it has become an indispensable learning resource for e-books and e-journals, often from well-known publishers, to support research and study. Since 2010, it has offered the academic communities both hard and soft information resources and services that are both current and developing. Over the years, the library has amassed a substantial collection of more than 700 books.

Total No. of Books – 766

DEPARTMENT LIBRARY DETAILS

S.No	Title of the Books	Quantity
1	Digital Signal Processing	92
2	Digital Image Processing	10
3	Antenna and Wave Propagation	15
4	Signals and Systems	37
5	Transmission Lines and Wave Guides	13
6	VLSI Design	31
7	Electronic Circuits	164
8	Medical Electronics	13
9	Embedded and Real Time Systems	8
10	Control Systems	43
11	Networking	47
12	Communication Theory	120
13	Principles of Management	78
14	Microprocessors and Microcontrollers	49
15	Electromagnetic Fields and Theory	25
16	Linear Integrated Circuits and its Application	21
	Total	**766**
